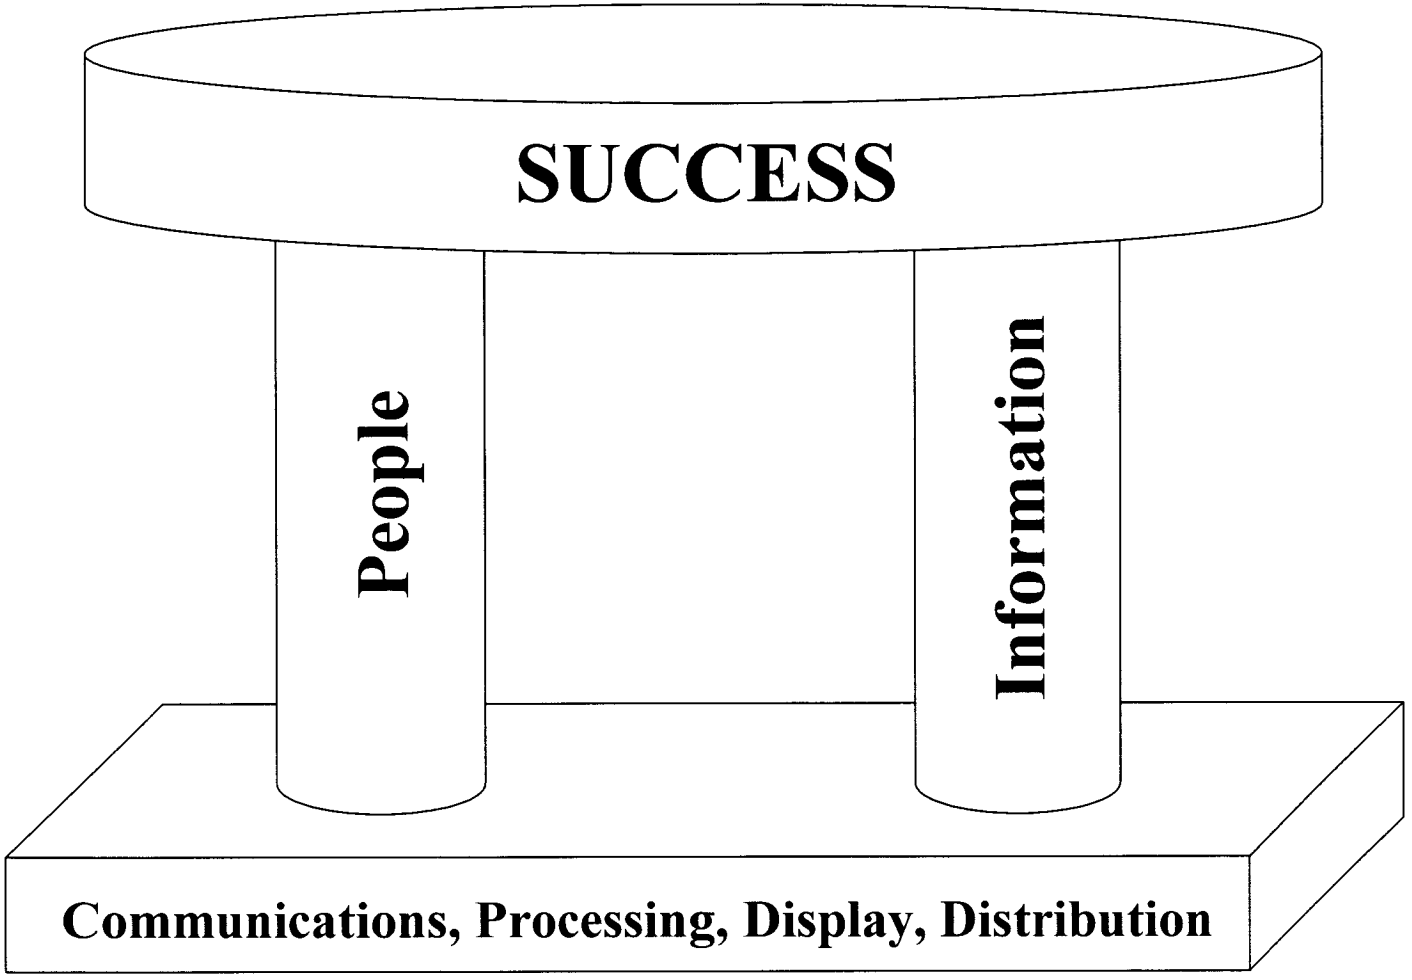
Information Coordination Center

Information Coordination Center



Y2K Information Coordination Center

Guiding Principles

- Common, consistent operational picture to the President and decision makers
- Owners fix their own problems at lowest level
- Use existing agencies and capabilities; supplement where needed
- Assess, assist where national interest, life and safety merit
- Federal Response Plan is the model
- Agencies validate their data
- Plan, template, routinely transmit info; transmit significant events on an exception basis
- One voice to the nation

Information Coordination Center

Two Kinds of Information

Functional characterization

- How the function/industry operates
- Key variables
- Normal business actions/response
- Remediation actions accomplished
- Contingency plans

Near-Real time operations

- Status
- Indicators of concern
- Early Warning
- Estimates of assistance required/return to service

Information Protection

- Originator, receiver procedures
- Database - integrity, encryption, read/write control
- Transmission protection - security and integrity
- Web site - access and security
- Proactive protective measures

Information Coordination Center

What Do You Get From Participation?

- Your assessment and words as input to the common operational picture
- Common operational picture available from protected site
- Early warning information
- Access to draw attention, voice concerns, request priority
- Improved national stature supports your business environment
