sustained non-life threatening injuries. Immediately following the attack U.S. Marines detained (b)(6), (b)(7)(C) is in Afghan custody at the Afghan National Detention Facility in Parwan, AFG. (b)(6), (b)(7)(C) is scheduled to be prosecuted by the Afghan government in Apr14. The Department of Justice has sent a Mutual Liaison Assistance Treaty to U.S. Embassy Kabul, AFG seeking investigative coordination with the Afghan government. Two of three key U.S. witnesses have been contacted and their availability to be re-interviewed was determined. Investigation continues.

NARRATIVE

1. This reactive investigation pertains to suspected violations of Article 118 (Murder) of the Uniform Code of Military Justice (UCMJ); Title 18 U.S.C. Section 1114 (Murder), which criminalizes the murder of U.S. Officers and employees operating in their official capacity; Title 18 U.S.C. Section 2332 (Murder), which criminalizes the murder of U.S. Nationals overseas; and the Government of the Islamic Republic of Afghanistan (GIRoA) Penal Code Article 395 (Murder), as related to the circumstances surrounding the "Green and Blue" shooting deaths of three U.S. Marines.

2. Upon review of the case file administrative errors were discovered. Previous Reference sections of captioned investigation incorrectly reflected the first ROI(INTERIM)'s date as 07Sep12, vice 11Sep12. Additionally, the review revealed an inadvertent omission of the 26Feb13 ROI(INTERIM) from the Reference section. This ROI(INTERIM) accurately reflects the corrected Reference section.

3. Since the submission of Reference (J), discussions continue between representatives from the Department of Justice (DoJ), U.S. Attorney's Office, Eastern District of New York (EDNY) and Department of State at U.S. Embassy Kabul regarding DoJ's submission of a Mutual Liaison Assistance Treaty (MLAT) seeking government-to-government criminal investigative assistance. NCIS and DoJ team members are seeking approval from the Afghan government to visit the Afghan National Army (ANA) Afghan National Detention Facility in Parwan (ANDF-P) near Bagram Airfield, AFG.

4. On 04Jun13, ANDF-P Joint Legal Center (JLC) U.S. points-of-contact were identified, which will assist in local coordination efforts. The GIRoA has full operational control of the ANDF-P and of (b)(6), (b)(7)(C) All requests to visit the ANDF-P will require coordination with and approval by U.S. Embassy Kabul and ANA (b)(6), (b)(7)(C) Commanding Officer, ANDF-P, AFG.

INITIAL RESULTS OF AUTOPSY FOR V/DICKINSON

1. On 14Aug12, Reporting Agent (RA) attended the autopsy of V/DICKINSON. The autopsy was conducted by the Armed Forces Medical Examiner System (AFMES) at the Charles C. Carson Center for Mortuary Affairs, Dover Air Force Base, Dover, DE. RA attended the autopsy based on lead tasking received from NCISRA Afghanistan, upon notification of the death of V/DICKINSON. V/DICKINSON was discovered deceased with a gunshot wound to the chest and groin while engaged in physical training (PT) aboard Forward Operating Base (FOB) Dehli, Garm Ser District, Helmand Province, AFG. (b)(6), (b)(7)(C) was captured shortly after the incident and an AK-47 was recovered from the scene.

2. (b)(6), (b)(7)(C) USN, MC, Deputy Medical Examiner, AFMES, performed the autopsy of V/DICKINSON, designated AFMES case number ME 12-0489. (b)(6), (b)(7)(C) USAF, photographed the autopsy. Selected autopsy photographs are summarized below, and a CD containing all photographs is attached, Enclosures (A) and (B) pertain. This report serves as a summary of the autopsy findings. Full autopsy findings will be available in the final autopsy report.

INITIAL INTAKE/ASSESSMENT

3. At the initiation of the autopsy, V/DICKINSON was observed without any clothing. V/DICKINSON had medical tubes in his mouth from previous life saving efforts, consistent with being intubated.

POSITIVE IDENTIFICATION

4. V/DICKINSON was positively identified through the comparison of a single fingerprint to standards contained in the Federal Bureau of Investigation (FBI) Automated Fingerprint Identification System (AFIS), Enclosure (C) pertains. The fingerprint collection and analysis was performed by FBI Physical Scientist/Fingerprint Specialist (b)(6), (b)(7)(C) V/DICKINSON was also positively identified by comparison of antemortem and postmortem dental records and radiographs, confirmed by (b)(6), (b)(7)(C) US Army, Enclosure (D) pertains.

PRELIMINARY AUTOPSY RESULTS

5. The body of V/DICKINSON was externally examined in the autopsy suite. V/DICKINSON had abrasions on his left knee and a small contusion under his chin. A small reddish bruise was also observed on V/DICKINSON's right side below the hip bone. X-rays indicated fragments of a projectile would be lodged in V/DICKINSON's pelvis area. There was a large laceration on the left side of his chest consistent with attempted life saving measures. Just below and to the right of the laceration was a very small hole with discoloration surrounding the hole. This was later determined to be an

entry wound from a projectile. An exit wound was subsequently located on left side, middle top to bottom, of V/DICKINSON's back. The trajectory of the shot indicated V/DICKINSON was shot almost "center mass" in the chest and the shot was referred to as a "through and through" shot meaning no projectile would be remaining in V/DICKINSON's body. A second entry wound was located in V/DICKINSON's groin area hidden by V/DICKINSON's pubic hair. Lividity was observed on V/DICKINSON's back which was consistent with the postmortem position. V/DICKINSON had no apparent defensive wounds.

6. Two fragments of a projectile were recovered by (b)(6), (b)(7)(C) Both were recovered from V/DICKINSON's pelvis area. There are burn marks and possible rifling characteristics on one of the fragments of the projectile. The two fragments were subsequently entered into the NCISFO Washington DC (DCWA) evidence custody system under log number 318-12.

REVIEW OF PERSONAL EFFECTS

7. No personal effects were transported to the autopsy location along with the remains of V/DICKINSON.

8. (b)(6), (b)(7)(C) provided a preliminary cause of death as gunshot wounds to the chest and groin and a preliminary manner of death as homicide. RA seized two sets of postmortem fingerprints from V/DICKINSON, later entered into custody as DCWA log number 318-12.

Carson Center for Mortuary Affairs, Dover Air Force Base, Dover, DE. RA and PA (b)(6), (b)(7)(C) attended the autopsy based upon lead tasking received from NCISRA Afghanistan, after notification of the death of V/RIVERA and others. On 10Aug12, at approximately 2030, (b)(6), (b)(7)(C) opened fire on several U.S. Marines, including V/RIVERA, with an AK-47 assault rifle while the Marines were in an open air makeshift gym aboard an Afghan National Police (ANP) compound, Forward Operating Base (FOB) Dehli, Garm Ser District, Helmand Province, Afghanistan.

2. (b)(6), (b)(7)(C) performed the autopsy of V/RIVERA, designated AFMES case number 12-0490. (b)(6), (b)(7)(C) USAF, AFMES, photographed V/RIVERA at intake, and (b)(6), (b)(7)(C) USN, AFMES, photographed the autopsy of V/RIVERA. Selected autopsy photographs are appended, and a CD containing all autopsy photographs is attached; Enclosures (A) and (B) pertain. This report serves as a summary of the preliminary autopsy findings. Full autopsy findings will be available in the final autopsy report.

INTAKE AND INITIAL ASSESSMENT

3. V/RIVERA was preliminarily examined in the intake area and RA observed he was unclothed and had multiple items of medical paraphernalia affixed to his body: an intubation tube protruded from his mouth, and intravenous lines were inserted into his right leg in the femoral region and at the shin. Bleeding wounds were present in the left side of V/RIVERA's neck and in his right side, and a gaping wound was present across his chest, resulting from medical intervention.

POSITIVE IDENTIFICATION

4. V/RIVERA was positively identified through the comparison of a single fingerprint to antemortem standards contained in the Federal Bureau of Investigation (FBI) Integrated Automated Fingerprint Identification System (IAFIS); Enclosure (C) pertains. (b)(6), (b)(7)(C) Physical Scientist/Fingerprint Specialist, FBI, performed the fingerprint collection and analysis. V/RIVERA was positively identified, additionally, through the comparison of antemortem and postmortem dental records and radiographs, performed by (b)(6), (b)(7)(C) USA; Enclosure (D) pertains.

The autopsy was conducted through the Armed Forces Medical Examiner System (AFMES) at the Charles C. Carson Center for Mortuary Affairs, Dover Air Force Base, Dover, DE. RA and PA (b)(6), (b)(7)(C) ... attended the autopsy based upon lead tasking received from NCISRA Afghanistan, after notification of the death of V/BUCKLEY and others. On 10Aug12, at approximately 2030, (b)(6), (b)(7)(C) ... opened fire on several U.S. Marines, including V/BUCKLEY, with an AK-47 assault rifle while the Marines were in an open air makeshift gym aboard an Afghan National Police (ANP) compound, Forward Operating Base (FOB) Dehli, Garm Ser District, Helmand Province, Afghanistan.

USAF, AFMES, photographed the autopsy of V/BUCKLEY. Selected autopsy photographs are appended, and a CD containing all autopsy photographs is attached; Enclosures (A) and (B) pertain. This report serves as a summary of the preliminary autopsy findings. Full autopsy findings will be available in the final autopsy report.

INTAKE AND INITIAL ASSESSMENT

3. V/BUCKLEY was preliminarily examined in the intake area and RA observed he was clothed in black Hanes brand underwear and black exercise shorts. The majority of V/BUCKLEY's bare skin was covered in apparent blood. V/BUCKLEY had multiple abrasions on his head including the peak of his forehead, his right temple, and the bridge of his nose. Gaping wounds were apparent at V/BUCKLEY's right clavicle and his left side near the armpit. Abrasions were also visible on both of his knees.

POSITIVE IDENTIFICATION

4. V/BUCKLEY was positively identified through the comparison of a single fingerprint to antemortem standards contained in the Federal Bureau of Investigation (FBI) Integrated Automated Fingerprint Identification System (IAFIS); Enclosure (C) pertains. (b)(6), (b)(7)(C) ... Physical Scientist/Fingerprint Specialist, FBI, performed the fingerprint collection and analysis. V/BUCKLEY was positively identified, additionally, through the comparison of antemortem and postmortem dental records and radiographs, performed by (b)(6), (b)(7)(C) ... USA; Enclosure (D) pertains.

PRELIMINARY AUTOPSY RESULTS
5. An external examination of the body of V/BUCKLEY revealed multiple apparent gunshot wounds including apparent entrance wounds on the right side of the back near the armpit, the right mid-back region, the left buttocks near the cleavage, and the side of the left buttocks (two (2)) wounds. Apparent exit wounds were present on the lower left side of V/BUCKLEY's neck, his right clavicle, and his upper left side. Abrasions were also noted on V/BUCKLEY's right elbow, right lower back, right hip, and both thighs.

6. The internal examination of V/BUCKLEY revealed extensive damage to multiple organs resulting from the gunshot wounds. (b)(6), (b)(7)(C) recovered one (1) bullet fragment each from V/BUCKLEY's heart, right psoas (a muscle of the lower torso), and diaphragm, and three (3) fragments from his lesser omentum (a portion of the lining of the abdominal cavity). RA seized the bullet fragments as evidence, entered into the NCISFO Washington DC Evidence Custody System under log number 319-12.

EXAMINATION OF CLOTHING
7. RA and (b)(6), (b)(7)(C) examined V/BUCKLEY's underwear and exercise shorts. Each garment was saturated with apparent blood and bore three defects from apparent gunshot wounds. The locations of the defects were consistent with the apparent entrance wounds located on the left side of V/BUCKLEY's buttocks. RA seized the exercise shorts as evidence, entered into the NCISFO Washington DC Evidence Custody System under log number 319-12.

8. RA collected postmortem fingerprints from V/BUCKLEY at the completion of the autopsy. The fingerprints were seized as evidence and entered into the NCISFO Washington DC Evidence Custody System under log number 319-12. provided the cause of V/BUCKLEY's death was from multiple gunshot wounds and the manner of his death was homicide.

4. On 15Mar13, RA reviewed and appended to this report the LEP ROI written by (b)(6), (b)(7)(C) pertaining to the interview of (b)(6), (b)(7)(C) an ANP soldier who was present during the aforementioned shooting and assisted in disarming (b)(6), (b)(7)(C) prior to the arrival of Marines assigned to the Quick Reaction Forces (QRF), Exhibit (42) pertains.

5. On 15Mar13, RA reviewed and appended to this report the LEP ROI written by (b)(6), (b)(7)(C) pertaining to the interview of (b)(6), (b)(7)(C) an ANP soldier who was present during the aforementioned shooting and assisted in disarming (b)(6), (b)(7)(C) prior to QRF's arrival.
