**b. If "No," ensure that DITPR or the authoritative database that updates DITPR is annotated for the reason(s) why a PIA is not required. If the DoD information system or electronic collection is not in DITPR, ensure that the reason(s) are recorded in appropriate documentation.**

**c. If "Yes," then a PIA is required. Proceed to Section 2.**

**SECTION 2: PIA SUMMARY INFORMATION**

**a. Why is this PIA being created or updated? Choose one:**

- New DoD Information System
- New Electronic Collection
- Existing DoD Information System
- Existing Electronic Collection
- Significantly Modified DoD Information System

**b. Is this DoD information system registered in the DITPR or the DoD Secret Internet Protocol Router Network (SIPRNET) IT Registry?**

- Yes, DITPR**      Enter DITPR System Identification Number
- Yes, SIPRNET**      Enter SIPRNET Identification Number

(2) Cite the authority for this DoD information system or electronic collection to collect, use, maintain and/or disseminate PII. (If multiple authorities are cited, provide all that apply.)

(a) Whenever possible, cite the specific provisions of the statute and/or EO that authorizes the operation of the system and the collection of PII.

(b) If a specific statute or EO does not exist, determine if an indirect statutory authority can be cited. An indirect authority may be cited if the authority requires the operation or administration of a program, the execution of which will require the collection and maintenance of a system of records.

The purpose of the system is to provide Military Treatment Facilities (MTF) the capability to monitor a patient's medical condition remotely from their home which will provide the following benefits: providers can follow patients who require ongoing management but do not necessarily require an office visit, 2) enabling management of established patients who have geographic barriers to care, and 3) and freeing up appointment slots for new patients and/or patients requiring face-to-face office visits. The equipment is portable and can travel with the patient, ensuring the ability of the MTF to maintain contact with the patient on a consistent basis. Home monitoring also offers the MTF the ability to send educational tips to patients.

The personal information collected is patient health data and patient identifier.

(2) Briefly describe the privacy risks associated with the PII collected and how these risks are addressed to safeguard privacy.

All systems are at risk because they may be vulnerable to unauthorized intrusion and hacking. There are risks that the RPHM System could be compromised while the data is in transit. Because of this possibility, appropriate security and access controls listed in this PIA are in place.
