f. Authority to collect information. A Federal law, Executive Order of the President (EO), or DoD requirement must authorize the collection and maintenance of a system of records.

(1) If this system has a Privacy Act SORN, the authorities in this PIA and the existing Privacy Act SORN should be the same.

(2) Cite the authority for this DoD information system or electronic collection to collect, use, maintain and/or disseminate PII. (If multiple authorities are cited, provide all that apply.)

(a) Whenever possible, cite the specific provisions of the statute and/or EO that authorizes the operation of the system and the collection of PII.

(b) If a specific statute or EO does not exist, determine if an indirect statutory authority can be cited. An indirect authority may be cited if the authority requires the operation or administration of a program, the execution of which will require the collection and maintenance of a system of records.

(c) DoD Components can use their general statutory grants of authority ("internal housekeeping") as the primary authority. The requirement, directive, or instruction implementing the statute within the DoD Component should be identified.

DoD Directive 5000.04 authorizes the OSD Deputy Director, Cost Assessments to establish procedural guidance for certain cost data collection systems and monitor system implementation by the DoD Components. In support of the VAMOS program, each Military Department develops and maintains a historical operating and support cost data collection system. Guidance on the VAMOS program is contained in the OSD Cost Assessment and Program Evaluation's Operating and Support Cost-Estimating Guide (formerly DoD 5000.4-M).

g. Summary of DoD information system or electronic collection. Answers to these questions should be consistent with security guidelines for release of information to the public.

(1) Describe the purpose of this DoD information system or electronic collection and briefly describe the types of personal information about individuals collected in the system.

The Naval VAMOS Application System (VAMOS) collects historical operating and support (O&S) costs on US Navy and Marine Corps weapon systems. As personnel costs make up the largest fraction of a weapon system's O&S costs, the Navy VAMOS Program collects US Navy and Marine Corps personnel costs and non-cost information and assigns them to the applicable weapon systems. These cost and non-cost data files are received separately from the Services (NPC N1 and HQMC) and the Defense Manpower Data Center. The only way to link these files (common field) is through the Social Security Number.

PII collected includes: Name, SSN, Gender, Race/Ethnicity, Birth Date, Child information: Number of dependents; Financial: All pays, allowances, bonuses, and entitlements available for each individual; Employment and Military Records information: Non-pay attributes including Active Duty/Reserve Indicator, Pay Grade, Geographic Locator Code, Additional Qualification Designation, Designator, Home Port, PEBD, Time in Rate, Present Date of Rank, Race, UIC, Billet and for Marines: MOS, MCC, Primary MOS, MOS Group, Active Duty RUC, and Active Duty RUC/MCC

(2) Briefly describe the privacy risks associated with the PII collected and how these risks are addressed to safeguard privacy.

As with any DOD IT system collecting such privacy-related data, the risk is inadvertent disclosure of the SSNs. Both cost and non-cost files are sent directly to the Naval VAMOS server through the DISA Secure File Gateway. Upon receipt, the System Administrator, ISSM, and PM are notified electronically. The System Administrator notifies the

PM and ISSM when the files are moved to a secure volume. The files are then encrypted. When the files are initially processed, the SSN is replaced by a locally-generated unique identifier. The original files and working copies are returned to the secure volume, along with the unique identifier / SSN reference file. The working copies of the files are only removed from the secure volume to process (aggregate) the data and match the records to the applicable weapon system. Once processed, the working files are returned to the secure volume.

h. With whom will the PII be shared through data exchange, both within your DoD Component and outside your Component (e.g., other DoD Components, Federal Agencies)? Indicate all that apply.
