Front End Applications Operational Database (FEA/ODB) is an architecture that provides web-enabled applications to meet operational requirements for daily business processing needs and to enhance and complement the use of Standard Systems including Defense Civilian Personnel Data System (DCPDS) and Defense Civilian Payroll System (DCPS). These applications provide automation of business processes to collect business information not currently collected by those Standard Systems.

FEA/ODB applications include the Locator application, Corporate Incentive Pay Applications (CIPA), the Warfare Center Information Tool (WCIT), Equipment Rental and Maintenance (ERM), and Visitor Control Point System (VCPS). These Front-End applications are used by the NSWC Dahlgren Division (includes Dahlgren and Dam Neck sites), and some modules are used by NSASP at the NSWCDD site and by other Warfare Center Divisions, including Panama City Division, Corona Division, and NSWC Indian Head EO Division.
