f. Authority to collect information. A Federal law, Executive Order of the President (EO), or DoD requirement must authorize the collection and maintenance of a system of records.

(1) If this system has a Privacy Act SORN, the authorities in this PIA and the existing Privacy Act SORN should be the same.

(2) Cite the authority for this DoD information system or electronic collection to collect, use, maintain and/or disseminate PII. (If multiple authorities are cited, provide all that apply.)

(b) If a specific statute or EO does not exist, determine if an indirect statutory authority can be cited. An indirect authority may be cited if the authority requires the operation or administration of a program, the execution of which will require the collection and maintenance of a system of records.

(c) DoD Components can use their general statutory grants of authority (“internal housekeeping”) as the primary authority. The requirement, directive, or instruction implementing the statute within the DoD Component should be identified.

g. Summary of DoD information system or electronic collection. Answers to these questions should be consistent with security guidelines for release of information to the public.

(1) Describe the purpose of this DoD information system or electronic collection and briefly describe the types of personal information about individuals collected in the system.

NTCSS is a tactical command support information system for the management of ships, submarines, aviation squadrons, and intermediate maintenance activities. The NTCSS Relational Administrative Data (R-ADM) application serves as the afloat personnel management system and maintains personal information including: Name, Social Security number (SSN), gender, race/ethnicity, birth date, place of birth, home telephone number, personal email address, mailing/home address, religious preference, security clearance, spouse information, marital status, dependent child information (citizenship, sex, date of birth, address, phone number, e-mail address), medical information, military records, and education information.

(2) Briefly describe the privacy risks associated with the PII collected and how these risks are addressed to safeguard privacy.

The perceived threats are primarily computer hackers, disgruntled employees, state sponsored information warfare, and acts of nature (e.g., fire, flood, etc.).

Authentication. This interface authenticates using DOD PKI and is compliant with current Navy and Marine Corps Fleet Firewall Enclave policy.

Authorization. This interface authenticates using DOD PKI and is compliant with current Navy and Marine Corps Fleet Firewall Enclave policy.

Data integrity. All data is transferred using a FIPS-compliant SFTP (port 22) over an established FIPS SSH connection.

Confidentiality. NTCSS logon and file access control limits interactive user access to authorized files. Only the authorized R-ADM Batch User (supbtusr) or authorized system administrator(s) with ‘root’ authority have access to R-ADM data transmitted by Auto-NTMP.

Auditing. Log files record the date and time of all successful/unsuccessful file transfer attempts for the most recent 30-day period.

Malicious code. Software peer reviews prevent malicious code and back door access methods from being written in-house.

h. With whom will the PII be shared through data exchange, both within your DoD Component and outside your Component (e.g., other DoD Components, Federal Agencies)? Indicate all that apply.
